

## **Opportunity: Project Manager - Fuel Systems**

### **Fluid Solutions, LLC**

Location: Birmingham, AL, USA

Travel: Required as project needs dictate

Fluid Solutions, LLC, a 19-year company operating in over 150 countries worldwide, is seeking a **Fuel Systems Project Manager** to assist in the pricing, design, and management of domestic and international Fuel System and Tank Storage projects. The ideal candidate should possess a working knowledge of pumping systems—preferably fuel systems—and the ability to create proposals and working systems based on project-specific specifications and drawing sets, even when incomplete or inaccurate.

### **Key Responsibilities:**

- Pricing and managing domestic and international fuel system and tank storage projects (Fuel, AFFF, OWS, etc.).
- Reviewing specifications and drawings to create proposals for functional systems.
- Pricing regularly offered parts for established and emerging clients.
- Assisting with submittal production and review in coordination with the Division Manager.
- Assisting with coordination drawings and reviewing design layouts.
- Procuring parts and equipment for both international and domestic projects.
- Assisting in the design and estimation of domestic underground storage tank projects.
- Interfacing with manufactures to release orders, establish shipping schedules, and coordinate with logistics for receiving and quality checks.
- Following up with clients on proposals, submittals, and orders to maintain strong relationships.
- Traveling as necessary and justified for training, support, and project execution

### **Minimum Qualifications:**

- Education: Bachelor's degree (4-year) in Engineering, Construction Management, Business, or a related field; equivalent combination of education and/or relevant experience may be considered.
- 5+ years of experience in estimating and/or field service within the fuel industry.
- Working knowledge of USTs and/or fuel systems, with a basic understanding of mechanical systems, including pumps and tanks.
- Ability to put together functional systems based on incomplete or inaccurate drawing sets.
- Strong organizational and communication skills focused on collaboration, transparency, and attention to detail—across calls, emails, and face-to-face interactions.
- Customer-focused mindset demonstrating responsiveness, proactivity, and honesty.
- Eagerness to learn and grow technical knowledge in decentralized treatment and fuel distribution systems.
- Experience with creating and understanding process flow diagrams.
- Proficiency in Microsoft Office Suite (E.g. Excel, Word, Outlook)
- Proficiency with Mac-based systems is a plus
- Valid driver's license required

### **What's in it for you?**

- **Health and dental insurance:** Fluid Solutions covers 100% of your premiums; \$100/week for spouse and dependent coverage
- **401(k):** Eligible after 1 year, with Fluid Solutions matching 100% of your contributions up to 3% of your income and 50% of the next 2%
- **Paid time off**
- **Company-provided laptop and cell phone**
- **Company credit card (Amex)**

Note: Compensation and benefits may vary based on experience, qualifications, and company policy. This information provides a general overview.
